ELECTION COMMISSION OF INDIA

No. 23/1/2015-ERS (NERPAP)

Dated: 10th April 2015

To,

The Chief Electoral Officers of
All States and Union Territories.

Subject: Improvement in Electoral Rolls- National Electoral Rolls Purification and Authentication Programme (NERPAP)-Special Camp on 12.04.2015-regarding.

Ref: ECI letter No. 23/1/2015-ERS, dated 27.02. 2015

Sir/Madam,

I am directed to refer to the Commission's letter dated 27.02.2015 on the subject cited above and to state that as per the instructions contained therein, a nation-wide Special Camp has to be organised on 12.04.2015 (Sunday) at booth levels in all assembly constituencies in the Country by the EROs for NERPAP activities, and thereafter, atleast one such Special Camp will be organized every month on any Sunday, as fixed by CEOs. The Commission has directed that the following measures may be taken for the Special Camp immediately:-

1. Wide publicity of the programme – The Commission has directed that for the camp day programme and major activities, to be undertaken on the camp day, such as collection of Aadhaar, EPIC number and mobile number / mail ID and receiving applications for deletion of multiple entries / correction of entries / replacement of photographs will be given wide publicity in the following manner :-
 - (i) Publicity through print / visual / audio / Government websites or CEO's portal / various internet gateways / SMS or mobile phone.
 - (ii) Publicity through posters / distribution of pamphlets and other traditional local methods such as beat of drums.
 - (iii) All recognized political parties must be informed in writing by DEOs about the Camps. They should be requested to depute BLAs to remain present in the Camp.
 - (iv) The assistance of Booth Awareness Groups (BAGs) comprising of Booth Level Government Functionaries, para workers, representatives of local bodies, BLAs, BLVs, Head or representative of

Schools/Colleges in the Booth Area, NSS/NYK volunteers and member representatives of local CSO/NGO may also be taken for the publicity of the Special Camp and also for facilitating electors in collection of data and filling of the Forms etc. during the Special Camp. Further, electors should be made convinced that such details are being collected from them not only for sake of purification of electoral rolls but also for facilitation and extending services to the citizens during future elections.

2. Availability of copy of latest electoral roll of the part and Forms in sufficient quantity - BLOs shall keep copy of final electoral roll, 2015 of the relevant part and Forms 6, 6A, 7, 8, 8A and Format prescribed for collection of Aadhaar number, mobile number/email ID etc. in sufficient number at the designated location during Special Camp.
3. Activities on Special Camp day -
 - (i) Collection of Aadhaar, EPIC number and mobile number / e-mail ID through hard copy - The electors visiting the camp may be requested to give their above details in the format prescribed for Aadhaar submission. The BLO shall compare the details furnished in the formats with those in the original documents and return the original to the concerned elector then and there. The filled up format will be collected by BLO in the camp.
 - (ii) Collection of application for deletion of multiple entries and correction- The electors visiting the camp may be helped to search their names in the electoral roll available with BLOs and if name of an elector appears at more than one place, he may be requested to fill up Form 7 for deletion of his name from all those places except from that place where he actually resides. In case an elector submits his Form 7 for deletion of multiple entries relating to him appearing in the roll of some other part or some other AC, that Form should also be received at the Special Camp. After the camp a list of such Form 7 should be prepared and sent alongwith original Form 7 to the ERO of the concerned AC for taking necessary action. For correction of erroneous entries the elector may be advised to submit Form 8. Similarly, in case of shifting of address within an AC, the elector may be advised to fill up Form 8A.

- (iii) Collection of applications for improvement of image quality - If some elector makes a request for replacement of his old / poor quality image in the electoral roll / EPIC, he may be asked to submit Form 8 for the purpose.
 - (iv) It is further clarified that though, the Special Camps are being organised for the above activities, however, if a person submits Form 6 for fresh enrolment or change in address out of an AC, that should also be collected at the camp.
4. Visits by officers - DEOs / EROs / AEROs and Supervisors will monitor the activities at Special Camps. They will make visits to the polling stations on camp day. The officers will chalk out their travelling plans in such a manner that all the polling stations in their respective areas are covered atleast by any one of the officers and no polling station is left unvisited.
 5. Compilation of data and submission of report - Every BLO in-charge of the Special Camp at booth level shall submit a report (in format 1A and 1B enclosed) on the camp day activities undertaken on Special Camp day to the ERO. The Collector & District Election Officer, Medak has explained the following methodologies to be adopted for Aadhaar seeding to the representatives of the political parties for their better knowledge.

ELECTION COMMISSION OF INDIA

NIRVACHAN SADAN, ASHOKA ROAD, NEW DELHI -110001

F.No.23/Forms/2015-ERS

Dated: 15th April, 2015

To,

The Chief Electoral Officers of
All States & Union Territories.

Subject: Revision/Updation of Electoral Rolls- Collection of Aadhar Number from the applicants-regarding

Sir/Madam,

Your kind attention is invited to ECI letter No.23/1/2015 dated 27th February, 2015 conveying ECI decision to use Aadhar Number on voluntary basis wherever issued to a person, to authenticate its particulars with ER particulars available in ECI roll database. Presently, the Aadhar Number are being collected in a campaign mode under National Electoral Roll purification and Authentication programme (NERPAP) launched on 3rd March, 2015.

I am also to say that the Commission has taken a further decision to collect, hereafter Aadhar Number of the applicants who file Form 6, 7, 8, or 8A and do data entry of Aadhar Number in ER database. A field for Aadhar Number should immediately be created, if not done in the ER database. A copy each of Forms(s) 6, 7, 8 and 8A suitably adapted is enclosed. For future requirements, they should be printed in the enclosed formats. With a view to using existing stock and to avoid wastage of papers, hand stamping of the changes should be done.

The Commission is writing separately to Ministry of Law for making suitable amendments in Form 6, 7, 8 and 8A. It is made amply clear that furnishing of Aadhar Number is not mandatory but it is optional. Non furnishing of Aadhar Number will not be a ground for rejection of application. The applicants should be requested to give this information in their own interest to ensure defect free Electoral Roll, and for incorporation of correct data of electors in the rolls.

Kindly acknowledge receipt and ensure compliance by field election machinery.

Yours faithfully,

(NARENDRA N. BUTOLIA)

Respected Sir,	
I Damaju Srinivasa Kranthi Kumar, District President of Prakasam District Y.S.R.C.P.	

Commercial Wing would like to bring to your kind notice for necessary action against Election Commission which is pressuring the Voters through District Collector to link their Voter Cards with Adhar Cards from 01-4-2015. The Election Commission had issued orders to All District Collectors through the State Chief Electoral Officers to complete the linking of Voter Cards with Adhar cards by 15-05-2015 by making door to door campaign by BLO's. But Supreme Court directed the Central Government and all State Governments in its 23-09-2013 order in case No.T.P.47, 48 not to link Adhar Cards to Government subsidy and welfare programmes and it is not mandatory and should not cause any loss or any inconvenience to general public. Again the Supreme Court directed the same in its 16-03-2015 latest order by quoting the 23-09-2013 order. But both Central and State Governments are over looking the interim orders issued by Supreme Court and threatening the voters if they do not link their voter cards with their Aadhar Cards they wil not be allowed to cast their votes in future elections. Only 50 to 55% of people are having Adhar cards and remaining do not have Adhar cards. That to majority of cards are having mistakes either in surname or addresses or in other particular as that project was done by in experienced or unqualified or under qualified and the same is not tallied with voter other cards. If the government wants to comple the project on war foot it will take atleast 4 to 5 years. Only 65 crores of people have received Adhar cards, some have not received cards and others do not have cards at all. Even in latest budget also the government has not allotted any amount to that project for completing the same immediately. Then how it is possible to complete it before 15-05-2015. Even in its order the Supreme Court has said that the Adhar card is an I.D.Proof and it is not essential to link it to other Government Sponsored schemes or programmes. If the State Government insists to link to Election and Voter cards without any enactment it will be a contempt of court. We are welcoming the desicision of

New Delhi, March 16: The Supreme Court on Monday made it clear that Aadhar cards will not be mandatory for availing government benefits.

According to a Times of India report, the apex court has asked the Centre to follow its 2013 order on the issue.

Earlier in 2013, the apex court had also issued an interim order which had said Aadhaar card be not made mandatory for people for availing any government services and nobody should be deprived of any such facilities for want of the card.

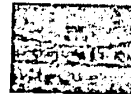

The Centre, UIDAI and three oil PSUs - IOCL, BPCL and HPCL - had later on moved the apex court seeking modification of its order that Aadhaar card is not mandatory and no person should suffer for want of it in getting the benefits of government schemes.

NOTE

As per the instructions issued in memo No. 1467/Elecs.E/A2/2015-1, dated 7.4.2015, visited the East Godavari and West Godavari Districts on 10th & 11th April 2015 and reviewed the progress of work relating to linking of Aadhar with Voter ID Cards and also purification of the Electoral Rolls with all EROs / AEROs in both the Districts. In both the Districts the door-to-door verification by BLOs is in progress and completed upto 30%. But the progress of data entry in the web site is slow due to various technical problems. The issues reported by the EROs / AEROs / Technical Persons of both the Districts have been listed below:

1. Aadhar – Voter ID Card linking Web Site / Server is very slow and the operators are able to enter 100 to 150 records only per day
2. Very frequently the application is logging out after entering 2 to 3 records. This is causing much difficulty in completing the data entry of BLO verified records.
3. Bulk approval facility is requested for ERO / AERO login for completing work in time.
4. Edit Option may be provided in case if the record is wrongly linked by the operator.
5. Option to enter the data using ERO / AERO login may be provided. With BLO Login, frequently the logout problem is happening. Moreover, difficulty arising in case of linking the records directly entered by the citizens since there is no option in the Software to know to which Polling Booth the record belongs to. Therefore, search & data entry option to the ERO also may also be provided.
6. Not getting data of Aadhar for non-consent data and also for some other records with a message as invalid IRIS / cancelled Aadhar.

7. For the Booth Level Awareness Groups a doubt is expressed whether to involve MPTCs, Sarpanches etc.
8. BLOs – Anganwadi workers protesting ^{attending} for the work of linking Aadhar and requesting for rescheduling their Departmental Programmes for some time to attend the Aadhar linking work.
9. Addl. Systems may be provided for completing the work quickly or permission may be given to get the addl. Systems on rental basis. The systems provided in 2009 at MRO Offices are not functioning properly.
10. Permission for engaging Operators for the data entry work may be given and provide budget for payment of remuneration to them.
11. Separate budget may be allocated for the Aadhar linking work
12. Timely payment of remuneration to the BLOs may be made and exclusive amount may be paid for this work.

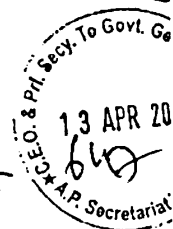

Submitted for favour of information.

Dear Shri Srivastava,

I am directed to refer to your letter no. 23/1/2015-ERS/283 dated March 16, 2015 regarding the review meeting of seeding of Aadhaar number with EPIC database under National Electoral Roll Purification and Authentication Programme (NERPAP).

2. On the queries raised by the CEOs during the VC, the replies are as under:

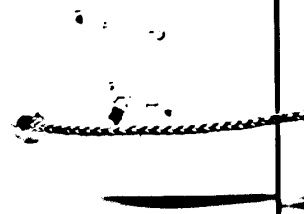

- As canvassing of NPR schedule has already been completed in 2010 and that EPIC number was not a part of NPR items of information, the same can not be collected now. However, in KYR+ Form, a specific column for collection of EPIC number exists. Instructions could have been issued by the ECI for making it compulsory for everybody to provide EPIC number in KYR + forms. But as the collection of EPIC was voluntary, the number of EPIC numbers collected are not high.
- The EPIC numbers collected through the KYR+ forms at the time of biometric enrolment under NPR, shall be shared with the CEOs of the States of Gujarat, Uttar pradesh and West Bengal.

ELECTION COMMISSION OF INDIA

NIRVACHAN SADAN, ASHOKA ROAD, NEW DELHI -11001

Dated: 15th April, 2015

GI No 23/Forms/2015-ERS

No.	10,1581
Date :	21/04/15
Section	

The Chief Electoral Officers of
All States & Union Territories.

Subject: Revision/Updation of Electoral Rolls- Collection of Aadhar Number from the applicants-regarding

Sir/Madam,

Your kind attention is invited to ECI letter No.23/1/2015 dated 27th February, 2015 conveying ECI decision to use Aadhar Number on voluntary basis wherever issued to a person, to authenticate its particulars with ER particulars available in ECI roll database. Presently, the Aadhar Number are being collected in a campaign mode under National Electoral Roll purification and Authentication programme (NERPAP) launched on 3rd March, 2015.

I am also to say that the Commission has taken a further decision to collect, hereafter Aadhar Number of the applicants who file Form 6, 7, 8, or 8A and do data entry of Aadhar Number in ER database. A field for Aadhar Number should immediately be created, if not done in the ER database. A copy each of Forms(s) 6, 7, 8 and 8A suitably adapted is enclosed. For future requirements, they should be printed in the enclosed formats. With a view to using existing stock and to avoid wastage of papers, hand stamping of the changes should be done.

The Commission is writing separately to Ministry of Law for making suitable amendments in Form 6, 7, 8 and 8A. It is made amply clear that furnishing of Aadhar Number is not mandatory but it is optional. Non furnishing of Aadhar Number will not be a ground for rejection of application. The applicants should be requested to give this information in their own interest to ensure defect free Electoral Roll, and for incorporation of correct data of electors in the rolls.

Kindly acknowledge receipt and ensure compliance by field election machinery.

Yours faithfully,

(NARENDRA N. BUTOLIA)
SECRETARY

SOE

ELECTION COMMISSION OF INDIA

Nirvachan Sadan, Ashoka Road, New Delhi-110001

No. 23/1/2015-ERS

Dated: 27th February, 2015

To,

The Chief Electoral Officers
Of all States/Union Territories

Subject: Improvement in Electoral Roll - Launching of National Electoral Rolls Purification and Authentication Programme (NERPAP) on 03.03.2015- regarding.

Sir/Madam,

It has been brought to the notice of the Commission that even after completion of summary revision of electoral rolls w.r.t 01.01.2015, numerous types of errors and defects, viz: multiple entries, repeating images, repeating EPIC number etc, still exist. The procedures of correction of errors, deletion of multiple entries and replacement EPIC are not streamlined or not followed properly in some states. The field level functionaries such as EROs / AEROs / BLOs are not giving desired attention to the disposal of such complaints within the given time frame. This has been causing a lot of inconvenience to the voters who, in turn blame the Commission for such scenario. This situation is totally unacceptable. The Commission gives highest priority to the maintenance of electoral roll and has reiterated that the roll should be without any defects, errors and multiple entries. In some cases, the courts have expressed concern on defective rolls. There is also a need to generate awareness among citizens as to how they can avail the facility of on line applications.

2. Hence, the Commission, with the objective of bringing a totally error free and authenticated electoral roll and after considering the inputs of CEOs, has decided to launch a comprehensive programme, i.e. "National Electoral Roll Purification and Authentication Programme (NERPAP), from 03.03.2015 with a clear timeline and well defined goal.

3. Major Objectives of NERPAP

- (i) Linking and authentication of EPIC data of electors with Aadhar data of UIDAI only.
- (ii) Voluntary disclosure by the electors concerned of multiple entries pertaining to them and disposal of such cases within 15 days by the concerned EROs under intimation to the concerned electors.
- (iii) Corrections of errors or any relevant entry pertaining to electors within 15 days on production of cogent documentary evidence.
- (iv) Improvement of image quality, wherever requested, by following the due procedure.
- (v) Obtaining and feeding in the ER database, the mobile and email address of the electors so that periodic information of poll day,

- 1 of 9 -

revision schedule, deletion/correction notice etc and other facilitation services can be provided to them

4. Methodology of Aadhar Feeding

Feeding of Aadhar number in EPIC database will be done in the following manner:-

(A) Feeding of Aadhar number and EPIC number by electors through:-

- (i) National Voters Service Portal (NVSP) using web services through Election Commission website.
- (ii) SMS to '51969'
- (iii) E-mail
- (iv) Mobile app which is under development and is likely to be available by 1st week of March, 2015.
- (v) By making a call at toll free number '1950' to State call centres.
- (vi) By submitting the details of Aadhar number and EPIC number in a hard copy of duly filled up Format (Annexure-A) along with photocopy of both the documents, namely, EPIC and Aadhar letter/card.

(B) Collection and feeding of Aadhar by electoral machinery:-

- (i) BLO will collect the details of electors during door to door survey/visit.
- (ii) The EROs / AEROs will also collect the aforesaid details through Voter Facilitation Centres, e-Seva centres and Citizen Service Centres authorised by the DEOs.

In both of the cases EROs will have to get the data entry done on NVSP portal.

The methodology developed by the CEO, Andhra Pradesh & Telangana in the state to link Aadhar data with EPIC data can simultaneously be adopted along with national model in Andhra Pradesh & Telangana. If some other states have developed their own methodology/application, the same can also be adopted by the concerned states. IT division of ECI shall ensure integration of the data at the state and central level.

5. Preparatory Activities of NERPAP

For launching of NERPAP, the preparatory activities will be completed in the following manner:-

ELECTION COMMISSION OF INDIA

Nirvachan Sadan, Ashoka Road, New Delhi-110001

No: 23/1/2015-ERS

Dated: 27th February, 2015

To:

The Chief Electoral Officers
Of all States/Union Territories

Subject: Improvement in Electoral Roll - Launching of National Electoral Rolls Purification and Authentication Programme (NERPAP) on 03.03.2015 regarding

Sir/Madam,

It has been brought to the notice of the Commission that, even after completion of summary revision of electoral rolls w.r.t. 01.01.2015, numerous types of errors and defects, viz. multiple entries, repeating images, repeating EPIC number, etc. still exist. The procedures of correction of errors, deletion of multiple entries and replacement EPIC are not streamlined or not followed properly in some states. The field level functionaries such as EROs / AEROs / BLOs are not giving desired attention to the disposal of such complaints within the given time frame. This has been causing a lot of inconvenience to the voters who, in turn blame the Commission for such scenario. This situation is totally unacceptable. The Commission gives highest priority to the maintenance of electoral roll and has reiterated that the roll should be without any defects, errors and multiple entries. In some cases, the courts have expressed concern on defective rolls. There is also a need to generate awareness among citizens as to how they can avail the facility of on line applications.

2. Hence, the Commission, with the objective of bringing a totally error free and authenticated electoral roll and after considering the inputs of CEOs, has decided to launch a comprehensive programme, i.e. "National Electoral Roll Purification and Authentication Programme (NERPAP)", from 03.03.2015 with a clear timeline and well defined goal.

3. Major Objectives of NERPAP

- (i) Linking and authentication of EPIC data of electors with Aadhar data of UIDAI only.
- (ii) Voluntary disclosure by the electors concerned of multiple entries pertaining to them and disposal of such cases within 15 days by the concerned EROs under intimation to the concerned electors.
- (iii) Corrections of errors or any relevant entry pertaining to electors within 15 days on production of cogent documentary evidence.
- (iv) Improvement of image quality, wherever requested, by following the due procedure.
- (v) Obtaining and feeding in the ER database, the mobile and email address of the electors so that periodic information of poll day,

- 1 of 9 -

revision schedule, deletion/correction notice etc and other facilitation services can be provided to them

4. Methodology of Aadhar Feeding

Feeding of Aadhar number in EPIC database will be done in the following manner:-

- (A) Feeding of Aadhar number and EPIC number by electors through:-
- (i) National Voters Service Portal (NVSP) using web services through Election Commission website.
 - (ii) SMS to '51969'
 - (iii) E-mail
 - (iv) Mobile app which is under development and is likely to be available by 1st week of March, 2015.
 - (v) By making a call at toll free number '1950' to State call centres.
 - (vi) By submitting the details of Aadhar number and EPIC number in a hard copy of duly filled up Format (Annexure-A) along with photocopy of both the documents, namely, EPIC and Aadhar letter/card.
- (B) Collection and feeding of Aadhar by electoral machinery:-
- (i) BLO will collect the details of electors during door to door survey/visit.
 - (ii) The EROs / AEROs will also collect the aforesaid details through Voter Facilitation Centres, e-Seva centres and Citizen Service Centres authorised by the DEOs.

In both of the cases EROs will have to get the data entry done on NVSP portal.

The methodology developed by the CEO, Andhra Pradesh & Telangana in the state to link Aadhar data with EPIC data can simultaneously be adopted along with national model in Andhra Pradesh & Telangana. If some other states have developed their own methodology/application, the same can also be adopted by the concerned states. IT division of ECI shall ensure integration of the data at the state and central level.

5. Preparatory Activities of NERPAP

For launching of NERPAP, the preparatory activities will be completed in the following manner:-

xv) Methodology to be adopted for Aadhar seeding:

Following are the different seeding approaches to seed the AADHAAR against the Electors:

(a) Collection by the BLOs:

CEO Office will supply / share the Electoral Roll / EPIC database with the SRDH application. The application will match the electoral roll / EPIC entry with Aadhaar / Ration card / or any other departmental data with wider coverage of population above 18 years of age and seed the Aadhaar number in the Electoral Roll. For the 50% and above matched cases, they will incorporate the Aadhaar number against the elector in the pdf being provided to BLO/ERO for verification. For EPIC having less than 50% matching with UID, Aadhaar will not be incorporated against their EPIC number. The list shall be generated in pdf format polling booth-wise duly sorting as per house number as being done for the electoral roll. These lists shall be made available online in the EPIC-Aadhaar Seeding Portal and the same can be downloaded by the ERO using log-in credentials. The downloaded lists shall be printed and supplied through the AEROs to the BLOs for field verification.

(P.T.O.)

(b) By submitting in hard copy

The elector can submit the details of Aadhaar number and EPIC number in a hard copy of duly filled up format at Annexure-A along with photocopy of both the documents, namely, EPIC and Aadhaar letter / Card.

(c) Self-Seeding - Online through NVSP Portal

Individual Elector can feed the Aadhaar number by giving Aadhaar and EPIC numbers through NVSP Portal

(d) Self-Seeding - Online through EPIC AADHAAR Seeding portal with OTP

Individual Elector can also feed the Aadhaar number by giving Aadhaar and EPIC Number through EPIC-Aadhaar Seeding Portal with the help of the OTP sent to the mobile of the elector.

(e) Mobile Seeding - Online through mobile

Voter can link Aadhaar number with the EPIC number through his / her mobile through Mobile App similar to the portal. After capturing the required information through mobile application, the Aadhaar number will be seeded against EPIC and updated on the portal automatically.

(f) SMS based Seeding

Electors can send an SMS containing the Aadhaar number and EPIC No. (Voter Card number) Eg: SEEDEPIC<space><EPIC No><space><Aadhaar No> to 8790499899 at State level or 51969 at National level . The application at the backend validates and seeds the Aadhaar number against Voter Card number automatically.

(g) Through Call Center-1950

Electors can make a phone call to Call Center Operator and give his/her EPIC (Voter Card number) and Aadhaar number. Upon receiving the details from Elector, Operator will feed the aadhaar online through portal

xvi) Procedure for door to door verification:

- In the matched cases (matching 50% and above) as well as not matched cases (less than 50%), the BLO has to go for door to door verification
- BLO shall verify the correctness of the Aadhaar number already incorporated in the list.

(P.T.O.)

-1195

- Wherever the UID number is not available, the BLO has to collect the copy of Aadhaar Card from the elector or note down the Aadhaar number from the original card and mention in the report.
- In case, the elector is not available / shifted his residence, suitable remarks such as dead, shifted, door lock, duplicate shall be made by the BLO duly enquiring from the neighbours.
- In case of door lock cases or absence of any adult member at the time of his visit, BLO shall visit that house at least three times on different occasions during morning and evening hours, and not during day time. Even after three such visits, he/she finds the house locked or is not able to meet any adult member of the household, then he/she should paste a sticker on the door, which, inter-alia, should mention:

"I had come to verify your name in the electoral roll and to collect the Aadhaar number to link with the electoral roll, but you are not available. Please contact me(name) (Mobile No.) at (Polling Station Address) on between 10.00 a.m. to 5.00 p.m or upload your Aadhaar number by using any of the three following methods:

Seeding through Portal : Links available in under AADHAAR Seeding, www.ceoandhra.nic.in, www.ceotelangana.nic.in

SMS : By sending an SMS

Format is SEEDEPIC <space> <EPIC No> <space> <Aadhaar No> is sent to a number 08970499899

Example SEEDEPIC BYX1234557 1234 5678 9101

Call Center: 1950

- Even after three such visits and pasting of sticker, if the elector does not turn up, the BLO shall report the matter to his Supervisor with a specific remarks that the elector is not the ordinary resident of the address given / shifted / dead / duplicate.
- The Supervisor shall re-verify 5% of such electors and report to the AERO / ERO for following the procedure for deletion of the name.

xvii) Action to be taken by the AERO /ERO:

- Computer Operator, Computer and internet connectivity shall be provided by the ERO / AERO for online data entry.
- Existing computers and other infrastructure already provided for Permanent DPLs at each Mandal headquarter by the office of the CEO shall be utilized for this purpose.

(P.T.O.)

- One Computer Operator and internet connectivity shall be provided by the DEO/ERO. Necessary funds will be released by this office on receipt of proposals from the DEO.
- AERO should take up supervisory check to the extent of 1% of the entries. The entries checked by Supervisors and AERO should be different from each other i.e. they should not visit the same household again and again for verification.
- For the multiple/duplicate entries in the electoral rolls, notices should be issued to the electors under Section 22 of R.P.Act, 1950 and full procedure of verification of facts should be followed by placing on notice board for a week based on the physical verification reports of the BLOs etc.
- ERO should also prepare (under Rule 21A of RER, 1960) a list of the names of dead persons and the persons who may have ceased to be ordinarily residents of the constituency and of persons who are otherwise not entitled to be registered in the roll.
- ERO shall then exhibit on the notice board of his office, a copy of the list together with a notice as to the time and place at which the question of deletion of these names from the roll would be considered.
- Such lists shall also be read in the Gram Sabhas and also made available with the BLOs on special campaign days.
- After considering any verbal or written objection that may be preferred, the Electoral Registration Officers shall decide whether all or any of the names should be deleted from the roll. But, before taking any decision in respect of any person on the ground that he has ceased to be or is not ordinarily resident in the constituency or is otherwise not entitled to be registered in that roll, the Electoral Registration Officer shall make every endeavor to give him a reasonable opportunity to show cause why the action proposed should not be taken in relation to him.
- After following the above mentioned procedure, Aadhaar number shall be seeded by ERO in the EPIC database in respect of each elector.
- For this, the ERO shall login to the EPIC-Aadhaar Web Portal
- If the details of EPIC & Aadhaar found matched, ERO can accept
- Once this seeding is completed, demographic verification will automatically run and rejected cases will again go to the respective Booth and will be visible in the BLO login and these need to be re-verified and submitted for seeding by BLO. If the re-submitted Aadhaar number is the same as seeded earlier then this seeding will not go to the demographic authentication and will be 'Force seeded' into the EPIC database.

(P.T.O.)

- Once the entire Demographic authentication is completed, SRDH will run a de-duplication process over the entire State to find out the duplicates based on the following:
 - o Same Aadhaar seeded against multiple EPICs
 - o Since both the databases – EPIC and UID are having photos, the duplicates can be easily identified.
 - o Lists of duplicates will be generated based on the Aadhaar number incorporated in the electoral rolls and said lists will be made available to the EROs in pdf format for further verification.
 - o Such duplicates can be removed duly following the procedure already mentioned supra.
- After door to door verification, the names of electors, who were found shifted / ineligible / multiple entries / not ordinary residents should be deleted from the electoral rolls during the data entry of Aadhar number as well as correction of entries, after due procedure as envisaged above.

xviii) SVEEP Campaign

- Launch the campaign at every Polling Station by the BLO through public meeting, explaining about the aims and objectives of NERPAP, reading out rolls, distribution of pamphlets, pasting of posters.
- DEOs / EROs shall organize the training to the Booth Level Officer and the members of Booth Awareness Groups
- Publicity through all possible means shall be taken up at district / AC / Booth Level by the DEO / ERO / AERO / BLO
- At the district headquarter, Call Centre with toll free number shall be established immediately and vide publicity be given.
- Commission will announce the Motivation and Award for BLO, ERO and DEO, who will achieve the 100% target in three categories of authentication, correction and deletion of multiple entries.

xix) Partnership with Stakeholders

To ensure active public participation following activities will be done at the district and ERO level;

- (a) Meeting and briefing of Political Parties at District and AC levels and requesting them to nominate BLAs for every PS for which they have not appointed BLAs so far. BLAs appointed earlier will continue as BLA unless their appointment is revoked by the political party concerned.

(P.T.O.)

- (b) BLOs shall be instructed to associate with the BLAs and BLVs actively in this campaign.
- (c) DEOs / EROs shall interact with the media regularly and brief them about the progress and associate them in this programme.
- (d) Take active support of Self Help Groups / Village Organisations in popularizing this programme and work closely with Civil Society Organizations/Resident Welfare Associations/Neighbourhood Committees.
- (e) Take active support of all youth and community based organizations and ensure active participation of all types of Local Bodies in the programme.

The Commission will provide an online-monitoring format to review the progress from Booth level to the State level, for which the DEOs / EROs shall furnish the status reports periodically, so as to furnish a consolidated report to the Commission on a weekly basis by the CEO. Formats will be communicated separately.

The Commission has directed that CEO shall monitor the programme closely while stock taking of the situation, target achieved and review of remaining work with DEOs and EROs from time to time. The Commission has directed that the following measures may be taken for the Special Camp immediately:-

1. Wide publicity of the programme - The Commission has directed that for the camp day programme and major activities, to be undertaken on the camp day, such as collection of Aadhaar, EPIC number and mobile number / mail ID and receiving applications for deletion of multiple entries / correction of entries / replacement of photographs will be given wide publicity in the following manner :-
 - (i) Publicity through print / visual / audio / Government websites or CEO's portal / various internet gateways / SMS or mobile phone.

 - (iii) All recognized political parties must be informed in writing by DEOs about the Camps. They should be requested to depute BLAs to remain present in the Camp.
 - (iv) The assistance of Booth Awareness Groups (BAGs) comprising of Booth Level Government Functionaries, para workers, representatives of local bodies, BLAs, BLVs, Head or representative of

Schools/Colleges in the Booth Area, NSS/NYK volunteers and member representatives of local CSO/NGO may also be taken for the publicity of the Special Camp and also for facilitating electors in collection of data and filling of the Forms etc. during the Special Camp. Further, electors should be made convinced that such details are being collected from them not only for sake of purification of electoral rolls but also for facilitation and extending services to the citizens during future elections.

2. Availability of copy of latest electoral roll of the part and Forms in sufficient quantity - BLOs shall keep copy of final electoral roll, 2015 of the relevant part and Forms 6, 6A, 7, 8, 8A and Format prescribed for collection of Aadhaar number, mobile number/email ID etc. in sufficient number at the designated location during Special Camp.

3. Activities on Special Camp day -

- (i) Collection of Aadhaar, EPIC number and mobile number / e-mail ID through hard copy - The electors visiting the camp may be requested to give their above details in the format prescribed for Aadhaar submission. The BLO shall compare the details furnished in the formats with those in the original documents and return the original to the concerned elector then and there. The filled up format will be collected by BLO in the camp.
- (ii) Collection of application for deletion of multiple entries and correction - The electors visiting the camp may be helped to search their names in the electoral roll available with BLOs and if name of an elector appears at more than one place, he may be requested to fill up Form 7 for deletion of his name from all those places except from that place where he actually resides. In case an elector submits his Form 7 for deletion of multiple entries relating to him appearing in the roll of some other part or some other AC, that Form should also be received at the Special Camp. After the camp a list of such Form 7 should be prepared and sent alongwith original Form 7 to the ERO of the concerned AC for taking necessary action. For correction of erroneous entries the elector may be advised to submit Form 8. Similarly, in case of shifting of address within an AC, the elector may be advised to fill up Form 8A.

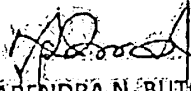

- (iii) Collection of applications for improvement of image quality - If some elector makes a request for replacement of his old / poor quality image in the electoral roll / EPIC, he may be asked to submit Form 8 for the purpose.
- (iv) It is further clarified that though, the Special Camps are being organised for the above activities, however, if a person submits Form 6 for fresh enrolment or change in address out of an AC, that should also be collected at the camp.
4. Visits by officers - DEOs / EROs / AEROs and Supervisors will monitor the activities at Special Camps. They will make visits to the polling stations on camp day. The officers will chalk out their travelling plans in such a manner that all the polling stations in their respective areas are covered at least by any one of the officers and no polling station is left unvisited.
5. Compilation of data and submission of report - Every BLO in-charge of the Special Camp at booth level shall submit a report (in format 1A and 1B enclosed) on the camp day activities undertaken on Special Camp day to the ERO. Your kind attention is invited to ECI letter No.23/1/2015 dated 27th February, 2015 conveying ECI decision to use Aadhar Number on voluntary basis wherever issued to a person, to authenticate its particulars with ER particulars available in ECI roll database. No. 23/1/2015-ERS (NERPAP)

Date: 16th March, 2015

To,

The Chief Secretaries of
all States / UTs

Subject: - Improvement in Electoral Roll - Launching of National Electoral Rolls Purification and Authentication Programme (NERPAP) - reg.

Sir/Madam,

I am directed to inform that as you are aware the Commission, with the objective of bringing a totally error free and authenticated electoral roll, has launched a comprehensive programme, i.e., National Electoral Rolls Purification and Authentication Programme (NERPAP) w.e.f. 03.03.2015, with a clear timeline for completion by 15.08.2015. A copy of Commission's instructions contained in letter No. 23/1/2015 - ERS dated 27.02.2015 is enclosed herewith for information.

2. The Commission has reviewed preparedness of programme with Chief Electoral Officers of all States and UTs through a Video Conference on 12.03.2015. Several Chief Electoral Officers have informed that the Electoral Registration Officers in many States have not been provided regular manpower as data entry operators and IT infrastructure at their offices, required for this programme.

3. The Commission has considered the requests from the Chief Electoral Officers and has desired that the offices of EROs / AEROs may kindly be strengthened immediately and every ERO / AERO should be provided with atleast one computer with internet connection and one printer along with one data entry operator in his office exclusively for election work.

4. The Commission has also directed that the vacancies of Booth Level Officers, if any, may be filled immediately so that the ground work for the programme can be completed within the given schedule. In this connection, the Commission has approved a one time remuneration of Rs. 2500/- for a BLO and Rs. 5000/- for a Supervisor for supervision in 8 - 10 polling stations for this programme. The remuneration of Rs. 2500/- as mentioned, to the BLOs will be in addition to the annual honorarium / remuneration, currently being paid to them.

5. The Commission has asked the Chief Electoral Officers to make specific proposals as the above points to the State Government. It is requested that the proposals whenever received from Chief Electoral Officers may kindly be considered positively.

Yours faithfully,

(NARENDRA N BUTOLIA)

Dear Shri Srivastava,

I am directed to refer to your letter no. 23/1/2015-ERS/283 dated March 16, 2015 regarding the review meeting of seeding of Aadhaar number with EPIC database under National Electoral Roll Purification and Authentication Programme (NERPAP).

2. On the queries raised by the CEOs during the VC, the replies are as under:

- As canvassing of NPR schedule has already been completed in 2010 and that EPIC number was not a part of NPR items of information, the same can not be collected now. However, in KYR+ Form, a specific column for collection of EPIC number exists. Instructions could have been issued by the ECI for making it compulsory for everybody to provide EPIC number in KYR + forms. But as the collection of EPIC was voluntary, the number of EPIC numbers collected are not high.

- The EPIC numbers collected through the KYR+ forms at the time of biometric enrolment under NPR, shall be shared with the CEOs of the States of Gujarat, Uttar Pradesh and West Bengal.

With regards,

Yours sincerely,

Solution: Instead of loading all the records only one record at time by giving Sl. No. or epic number so that BLO can seed one by one record and remove hyperlink for existing records and alert message has to be displayed. **Status: completed**

2. Application log files need to be generated for identifying the problems and making necessary changes in the application. These need to be provided to Ravi CMC and Ashok, IT Grid for analysis besides getting it analysed by eCentric professionals. . In addition to these log files Configurations of Hibernate , Tomcat, Apache also has to be shared **(Action: Naveen, eCentric, EDC: 29.04.2015).**

3. Instead of updating the records in the same table, Maintain separate table for inserting the status of the records and storing UID.

(Action: Naveen, eCentric, EDC: 30.04.2015).

List of long standing Queries in application has to be shared Ravi to analyse and optimize. Ravi should give his feedback by 29th April.

(Action: Naveen, eCentric, EDC: 28.04.2015).

4. eCentric has to do the overall application testing and give report based on log files and other technical parameters by 1st May 2015 along with rectification plan. This issue has already been informed telephonically to Mr. Sridhar Gadhi of eCentric/Paradigm. **(Action: Naveen, eCentric, EDC: 1.05.2015).**

2. Enrolment of voters in Aadhaar - Pl circulate the existing kits in the permanent Enrolment Centers amongst the districts in mobile vans/jeeps etc. (Action: All District Collectors)
3. UID not enrolled list - Provide list of electors PS wise to districts for getting the Aadhaar saturated. (Action: Naveen, eCentric, 1st May 2015)
4. UID-EPIC list - Prepare list of all Aadhaar holders above 18 years who are not enrolled as voters and provide this list village wise to districts for getting these people enrolled. (Action: Naveen, eCentric, and Ravi CMC, 1st May 2015)
5. Provide updating facility to BLO - Provide updating facility to BLO for updating Aadhaar no. in the from 1st May 2015 (Action: Naveen, eCentric, 1st May 2015)
6. Running de-duplication at district level based on Aadhaar nos.-
This should be run after the deadline given by the district expires. Immediately it can be done in Nizamabad and Krishna districts. (Action: Ravi, EDC 4th May 2015)
7. Data not being fetched from SRDH - Waraprasad pl discuss this issue with District Collector Krishna, identify specific cases, identify issues therein, discuss with Viswanath and suggest solutions. (Action: Waraprasad, EDC 30th April 2015)
8. Budget provision to districts for BLO, Supervisor remuneration, data entry and publicity works - Mr. Venkateshwar Rao, Addl. CEO may kindly pursue and bring issues if any to the notice of CEO.

10. 10 Synchronizing with database at national level - Ravi CMC and Naveen eCentric should do it by 30th April 2015.

SOFTWARE ISSUES

1. Displaying all the records in one PS is taking long time to load all the records.

Solution: Instead of loading all the records only one record at time by giving Sl. No. or epic number so that BLO can seed one by one record and remove hyperlink for existing records and alert message has to be displayed. Status: completed

2. Application log files need to be generated for identifying the problems and making necessary changes in the application. These need to be provided to Ravi CMC and Ashok, IT Grid for analysis besides getting it analysed by eCentric professionals. . In addition to these log files Configurations of Hibernate , Tomcat, Apache also has to be shared (Action: Naveen, eCentric, EDC: 29.04.2015).
3. Instead of updating the records in the same table, Maintain separate table for inserting the status of the records and storing UID. (Action: Naveen, eCentric, EDC: 30.04.2015).
List of long standing Queries in application has to be shared Ravi to analyse and optimize. Ravi should give his feedback by 29th April. (Action: Naveen, eCentric, EDC: 28.04.2015).
4. eCentric has to do the overall application testing and give report based on log files and other technical parameters by 1st May 2015 along with rectification plan. This issue has already been informed telephonically to Mr. Sridhar Gadhi of eCentric/Paradigm. (Action: Naveen, eCentric, EDC: 1.05.2015).

ECI- ONE FORM - Concept Note

(Proposed By Tamil Nadu)

-1461-

ONE FORM

Background: In the workshop on Electoral Roll reforms held in Mysore on 19th and 20th June, 2014, discussion was held on simplifying various forms for name inclusion, deletion, modification etc. Tamil Nadu has invested time and energies in this endeavor as this initiative can ameliorate a number of issues concerned with filling of existing forms.

A: Issues with Current Forms:

- a. Too many forms. People want a single form
- b. Cumbersome to fill. 2-3 pages to be filled after reading 3 pages of instructions. People want simple and easy to fill forms with less intimidating instructions.
- c. Lengthy forms- online as well as offline. Many a details are available with us in our data base and we may not ask another version of same info. People want small form and finish with it fast.
- d. Form structure is not clear. People don't know (don't read the fine print) so as to know what is mandatory and what is optional. For eg. Part IV of form 6 is seldom filled by applicant despite having EPICs with them, thereby causing his/her form rejected by the ERO. Mandatory details to be clearly separated in the form.
- e. Data entry is critical component. Data entry operator type casual entries, while the applicant get incorrect entries in their rolls. Technology like ICR can limit the errors during data entry stage and reduce the burden of applications for correction.

B: ONE FORM:

- i. The proposed One Form takes into account these constraints and tries to create a solution to give ease to an applicant in filling the form and at the same time convenient for the system to manage form collection, data entry and database controls.
- ii. Taking cue from the other public friendly forms, the required application is clearly demarcated through thick border lines; and only mandatory part to be filled by applicant in para 1; after that the applicant is required to fill only the relevant box for inclusion/transposition (Form 6, 8A),

ECI- ONE FORM - Concept Note

(Proposed By Tamil Nadu)

- Objection/deletion(Form 7) and correction(Form 8).
- iii. The form 6A is not included as it is specific to a class of desirous citizens, and need not clutter the basic form for all other classes.
 - iv. All the fields are machine readable. There is nothing in the form that has to be written beyond what is expected to ticked or crossed.
 - v. Fields for the name of AC/PC, applicant name, address details and the e-mail id are the only fields where the unexpected fonts and numbers will come. With ICR, they may be read to the 70-80% quality. So, the role of data entry operator will be not the complete entry but only correction of fields captured by machine, thereby reducing the error substantially.
 - vi. During online filling of the forms at browsing centers, Common service centers, on tab by BLO during house visit and even at individual desktop, the data entered can be immediately converted into a QR code and same can be taken as an acknowledgement by the applicant and rather than a mere no. he can track the complete details of his data being processed including its correctness before it is included in the rolls and printed as a card.
 - vii. Paras:
 - Para I (applicant details) - is a mandatory para that will capture the basic details. Here, name entry has attracted a lot of debate. In Tamil Nadu there are no surnames; in fact request here has always been to gives space for mentioning the initials. Therefore it is suggested that only a simple name row should be used where entry is made of all-initials, first name, middle name and surname (inclusive of all). This will serve universal purpose all over the country and also save space of one or two rows in the form.
 - Para II is reworked content of form 6 and 8A. Even though form 8 A is generally construed as a correction requirement, but logically it is generation of a new serial number of an elector; the declaration sought from both the applicants are logically similar and both applicants are cautioned with S. 31 punishment. Clubbing 6 and 8A, it is felt will make it easier for tenant voters who keep changing their residence to maintain their name in rolls. They do not consider part boundaries while doing so, therefore they may not

ECI- ONE FORM - Concept Note

-1463'

(Proposed By Tamil Nadu)

be forced to fill form 8A if it's within part and 6 if it's a little farther section. The complexity of form 8A has resulted in overuse of form 6. One Form intends to correct it.

- Para III is a part of second box yet numbered separately. This is done with a purpose, as the part IV declaration has assumed criticality in the processing of inclusion application, this will continue the mnemonic perception of field staff and aid acceptance of One Form. Declaration for other requirements is given separately at para VI and is only limited to the truthfulness of information submitted.
 - Para IV is reworking of Form 7. Here, the reason for objection and deletion is also attempted to be captured in a predefined categories. These are open to further refining and inclusion of more and pointed reasons.
 - Para V is reworking of the form 8. Here the applicant only has to tick the field where the correction is needed. Here the doubts are raised as to the corrections sought should be asked here also as in form 8. It is felt that since we know the incorrect entries as in the EPIC and our database we can easily make the corrections as per the full and accurate mandatory entries submitted by the applicant in para I. Asking him the correct details again would defeat the inherent logic of One Form.
- viii. The AERO/ERO passes the order in the box specified for him on the basis of BLO remarks, ticking the right box and appending his signature
- ix. The BLO/Supervisor/Designated Officer gives his/her remarks as per pre-defined categories. These are open to further refining and inclusion of more and pointed reasons.
- x. The Acknowledgement is perforated and placed at the rear side without disturbing the information on front side; and can be given to the applicant immediately, filling the acknowledgement No. same as at the top of the form. In case the form is an online, a QR coded acknowledgement can be generated and a printout of same is given to the applicant.
- xi. In One side print, the BLO boxes are at one side, whereas in two sided it is one after other. However, in a

ECI- ONE FORM - Concept Note

(Proposed By Tamil Nadu)

single side, very less space is available for filling the entries in boxes.

- xii. ICR software available in market today are primarily converting English text; however creating a mechanism for vernaculars is not a difficult task. Tamil Nadu is attempting to do so.
- xiii. Any ways, even if the form is ICR read or normal data entered, the ONE FORM concept will give great relief to an elector/desirous citizen to feel encouraged to fill this one page form.
- xiv. Instructions to fill the form are underway, and are attempted to be as simple as possible

Sir,

Sub:- Improvement in electoral rolls – Simplification of Forms for easy registration - regarding.

Ref:- From the ECI Letter No.22/2/2014-ERS, dt.29.04.2015 received through e-mail on 29.04.2015.

--:o0o:--

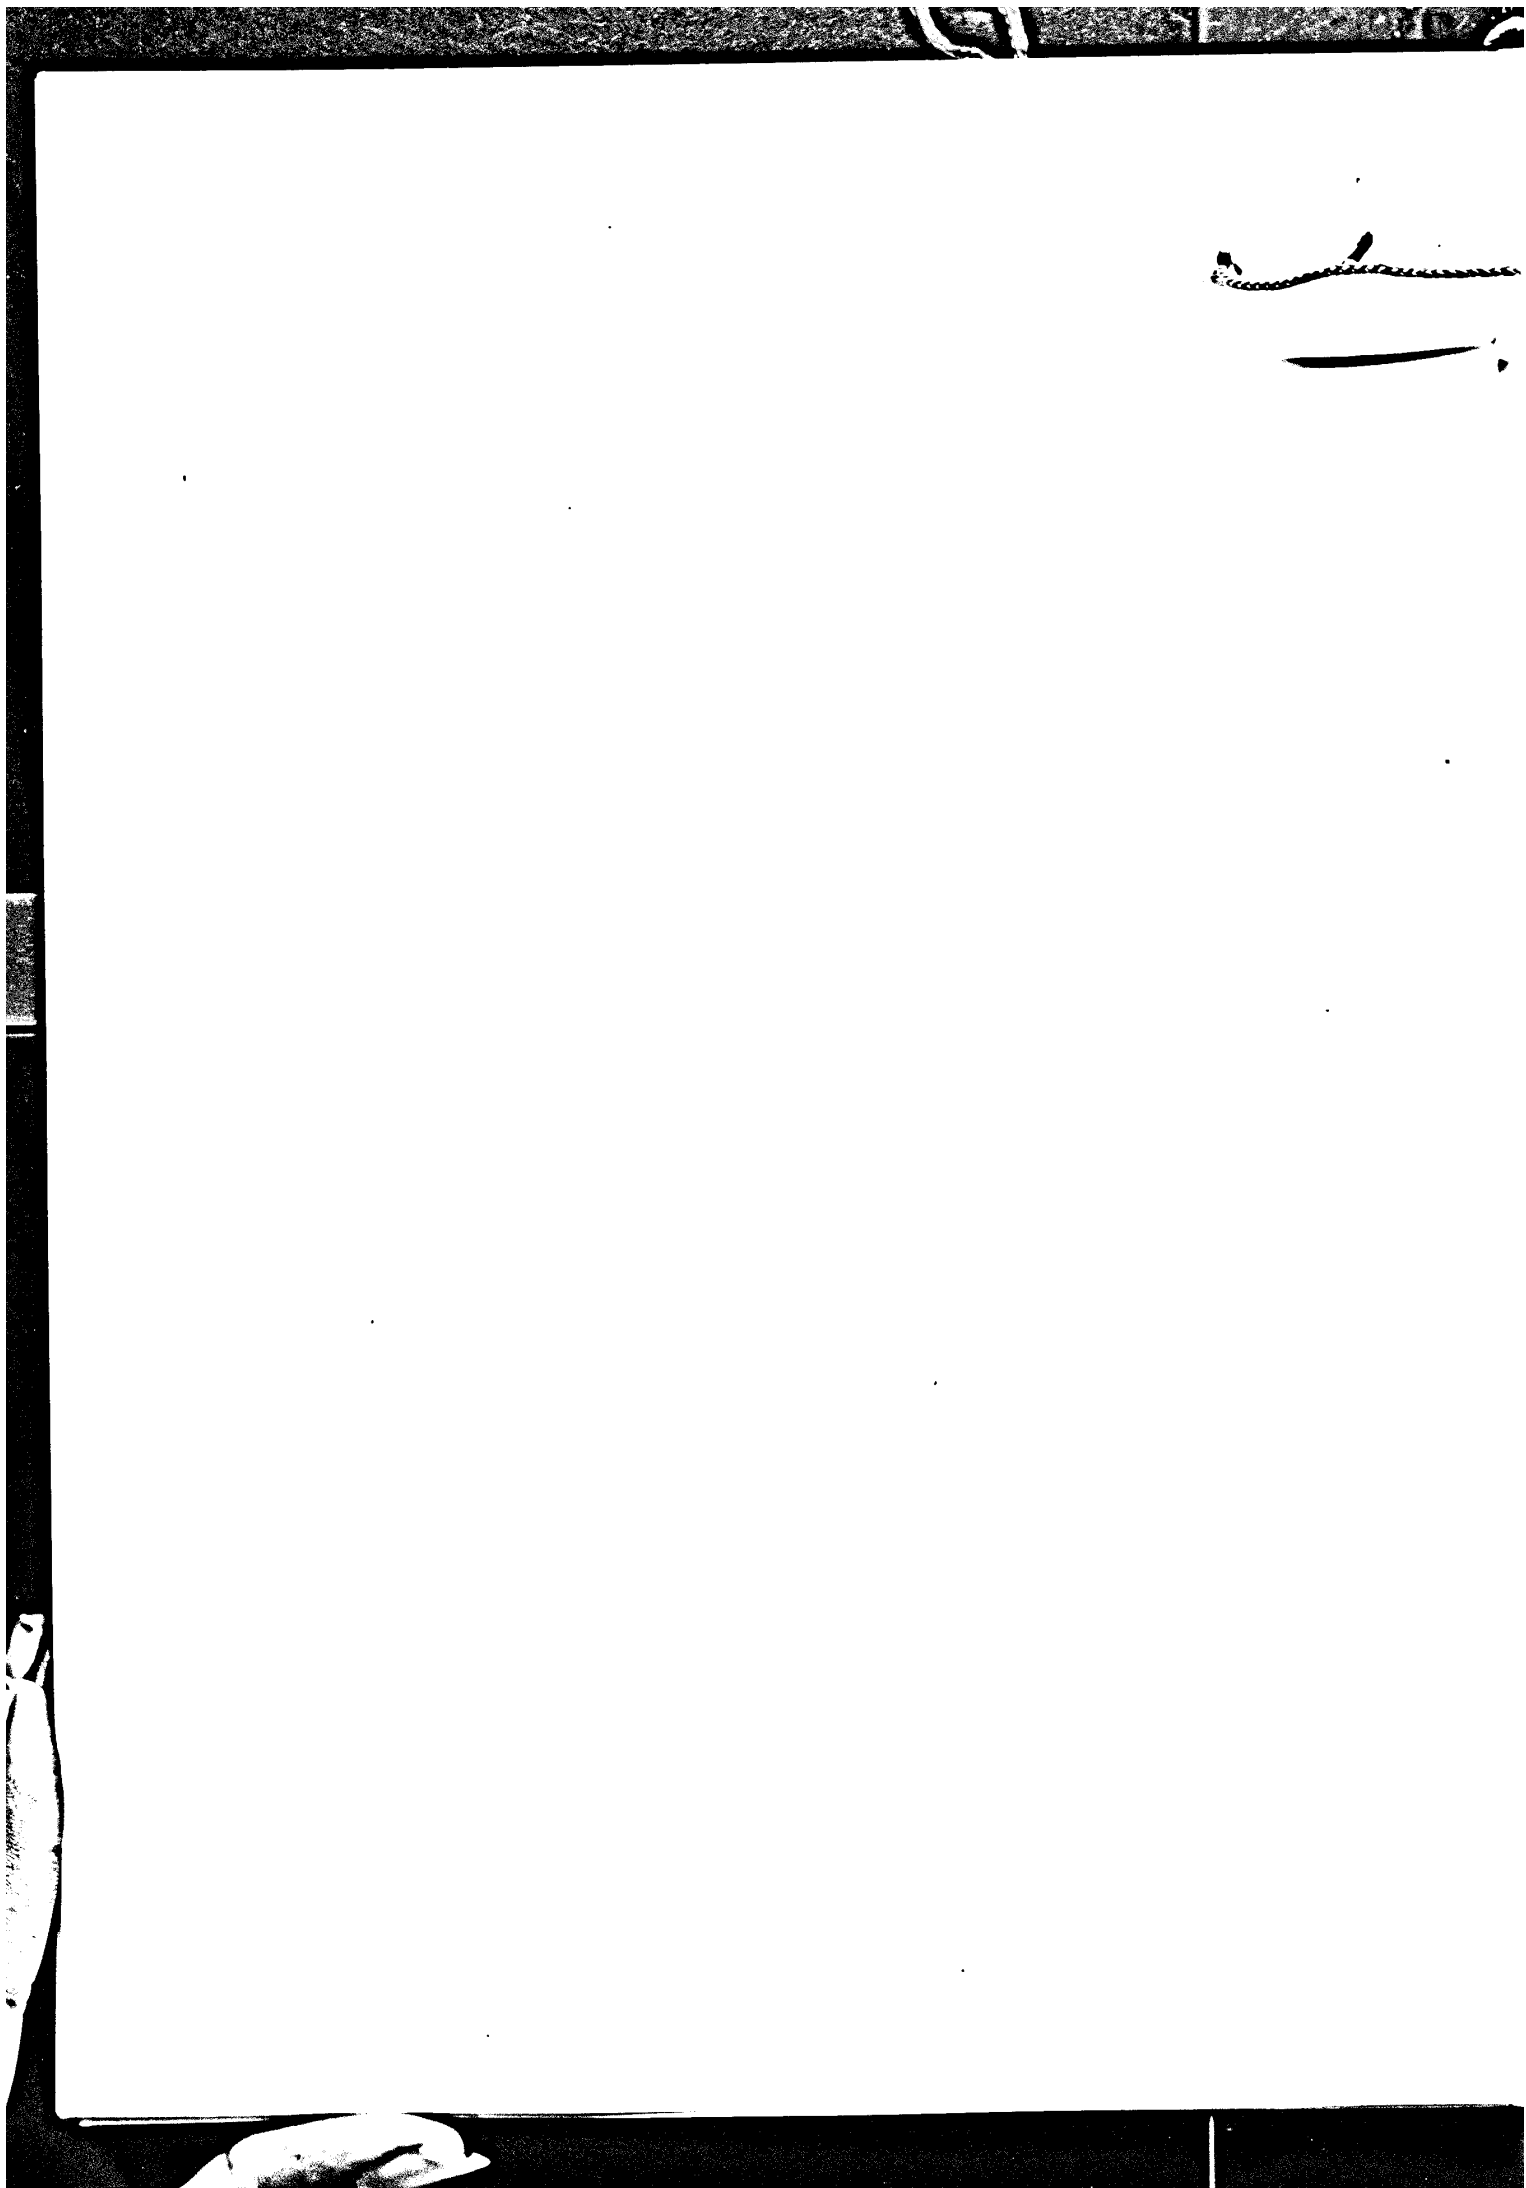

With reference to the ECI letter cited, it is suggested to have unified form with two sided print, since the larger space is available for filling the entries, so as to fill the entries by the applicant more visible and to make data entry correctly. It is also suggestible to make these forms printed so as to make normal data entry rather than ICR read forms, since ICR read forms are required additional infrastructure like scanners at ERO / AERO level, which involves huge expenditure.

Yours faithfully,

I invite kind attention to the reference cited.

I submit that in East Godavari district, the linkage of Aadhaar with electoral database commenced from 01.04.2015, from that onwards, collection and data entry is being done simultaneously by the Electoral Registration Officers engaged by more number of data entry operators.

I further submit that the site was not working for morning session i.e. from 08.00 AM to 08.00 PM, to provide additional servers for Aadhar - Voter ID Card linking, as the present server is very slow and the operators are able to enter 100 to 150 records only per day and the application is logging out very frequently after entering 2 to 3 records.

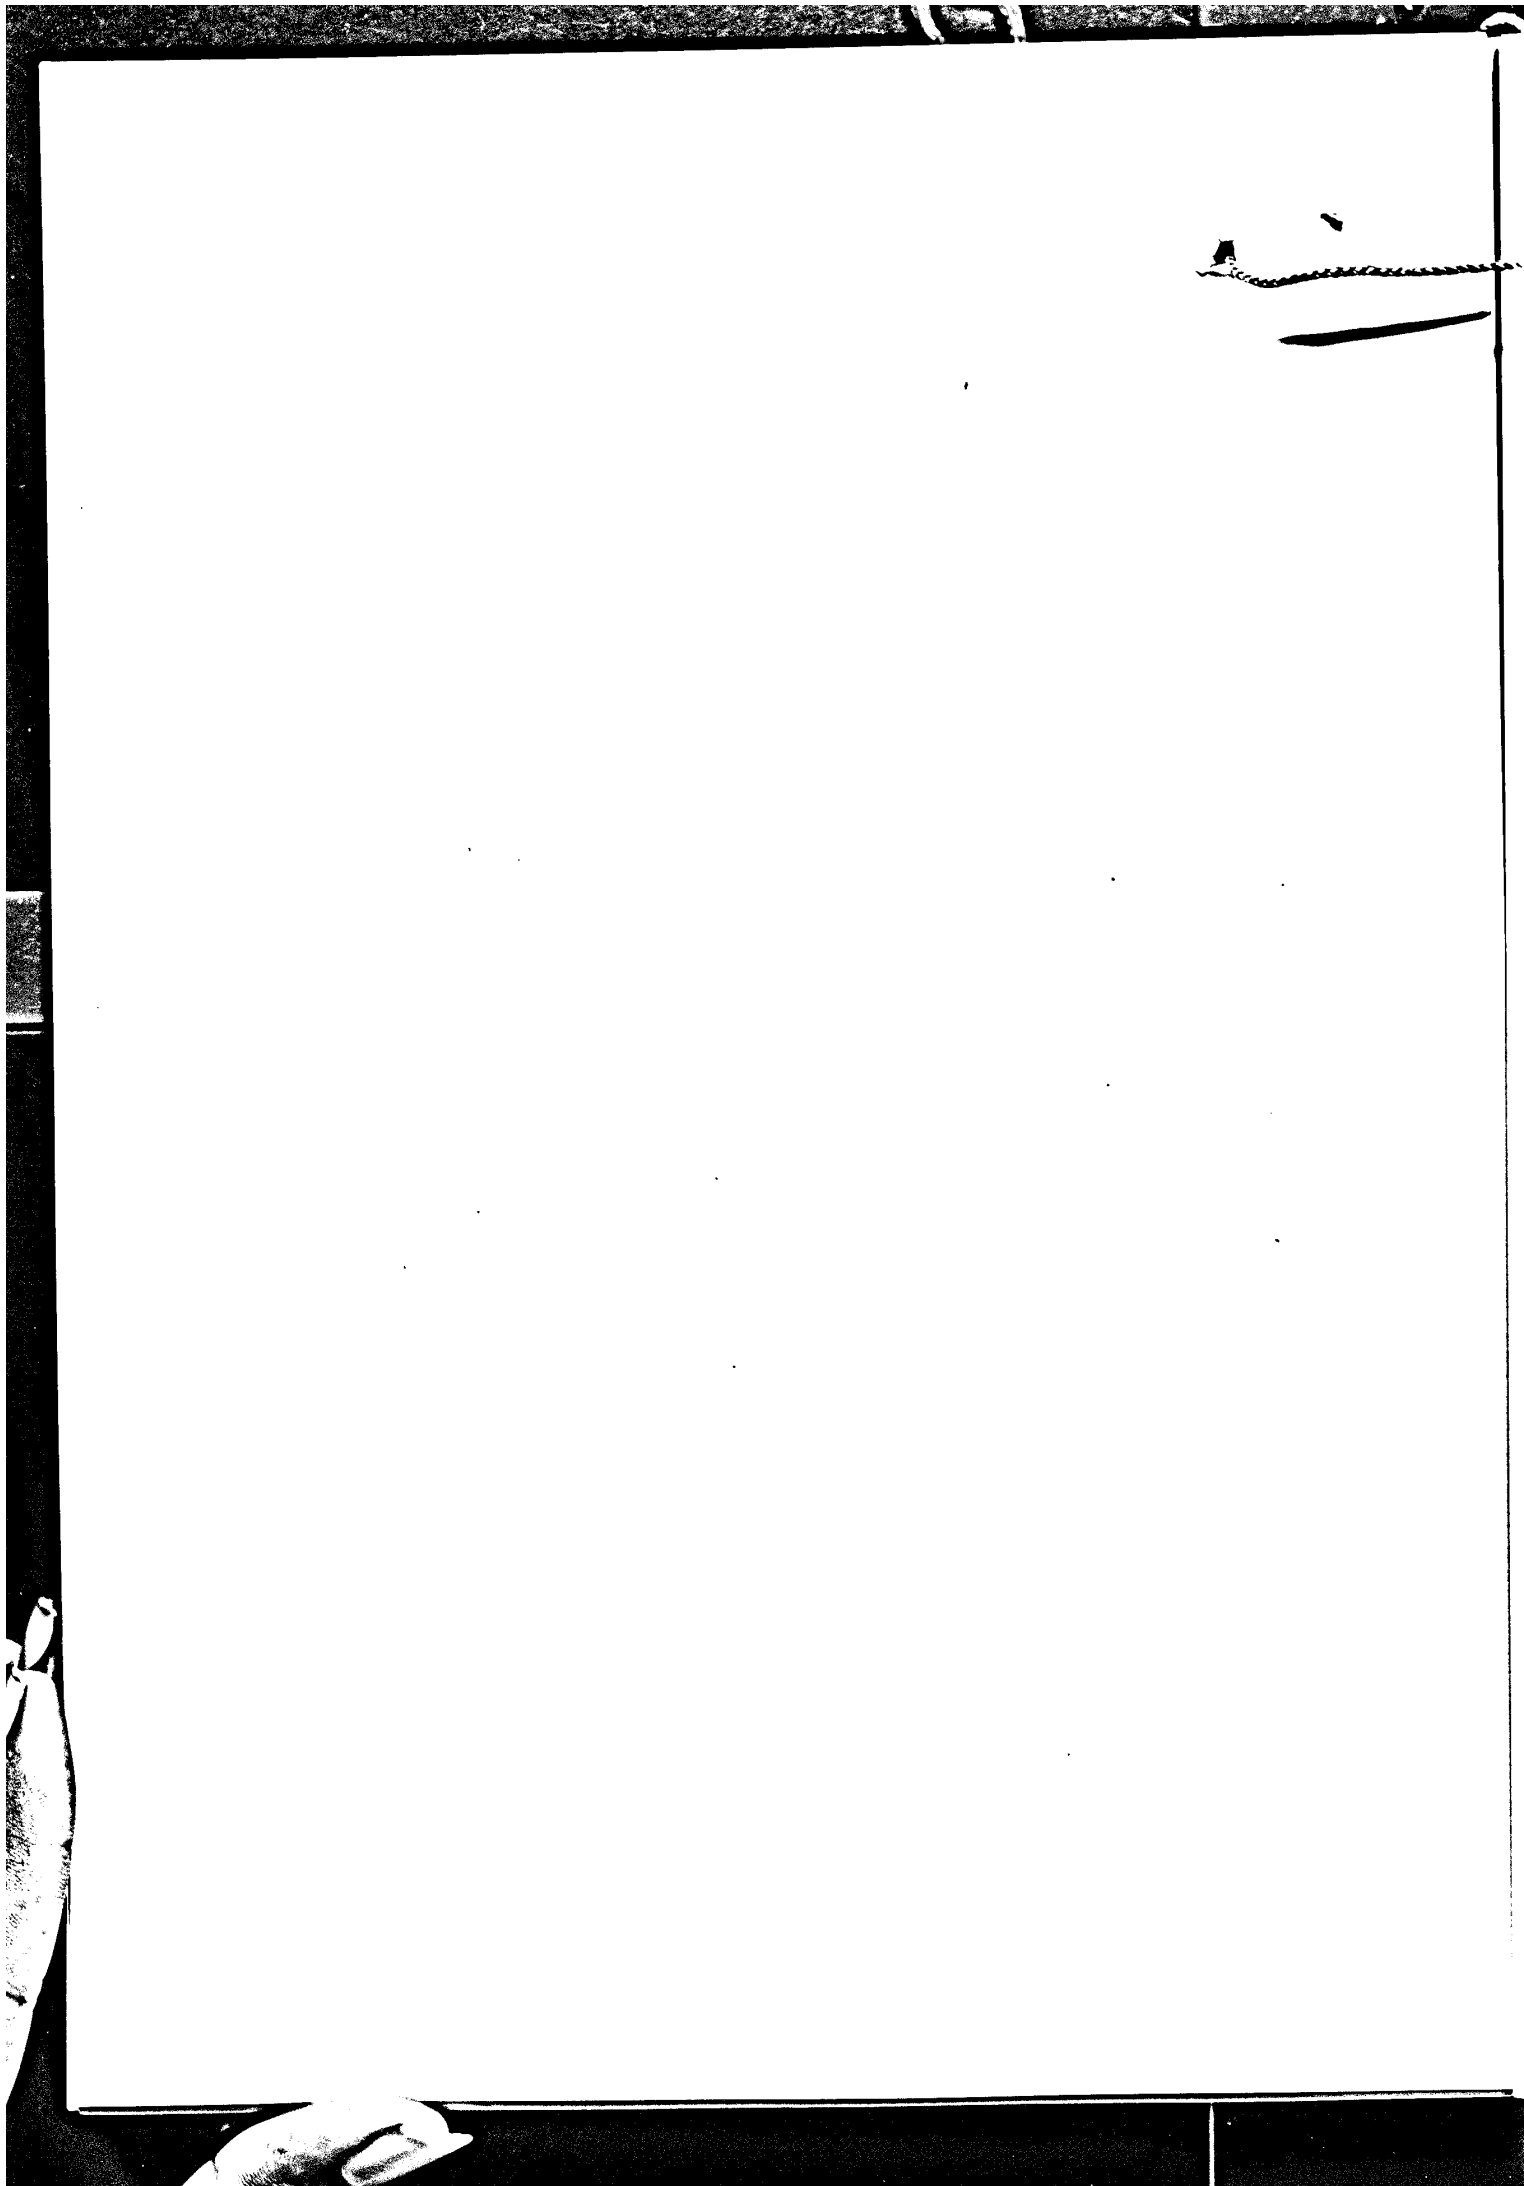

I request that the problem may be rectified immediately and separate URL may kindly be provided to East Godavari district for completion of collection and data entry of seeding in time as per the instructions of CEO, AP, Hyderabad during video conference held on 28.04.2015.

Letter No.736/Elecs.E/A2/2015-52

Dated: 04.05.2015

To

NIC, BRKR Bhavan, Hyderabad.

Sir,

Sub:- Electoral Rolls – Aadhaar linking with Electoral Roll / EPIC database through SRDH application – Cleansing and Matching of databases – Data entry in EPIC-Aadhaar Portal at field level – Complaints regarding Servers – Troubleshooting of issues – Reg.

—cc:—

You are aware that linking of EPIC with the Aadhar number is being taken up in Andhra Pradesh and Telangana through SRDH application. M/s.eCentric Solutions Pvt.Ltd., an identified agency for taking up the project by the ITE&C Department have customized the application for seeding the Aadhaar in the electoral roll database and the same has been hosted on ITE&C server along with the EPIC database. Booth Level Officers are collecting the Aadhaar data by visiting house to house and the same is entering in EPIC-Aadhaar Portal. As there are complaints regarding data entry is slow due to server problems, six servers with 320 GB RAM each have been provided with the help of ITE&C Depts., and NIC. But, the District Election Officers are still complaining that the server is very slow and the data could not be entered to the extent possible even though the collection of Aadhaar number is large.

It is further informed that it has been discovered by IT Professionals on 25.04.2015 that there are certain issues at Software

agency has taken steps for splitting the database district-wise and hosted on servers for accessing the districts and fine-tuning of software has also been taken to some extent. But, the problem is still persist and districts are not able to make data entry to the desirable levels.

In view of the above, I request you to provide good NIC resources from 04.05.2015 onwards to troubleshoot the issues as discussed. If required hire external resources to support your services and the office of the Chief Electoral Officer will make payment for all resources hired by you

2. Cloud CaaS Services offerings overview

BSNL Cloud Services are available across India through our Managed Cloud Platform (MCP), and are accessible via the Internet, Lease Line, MPLS options. The MCPs are currently deployed in Ahmedabad. We also offer private CaaS solutions that can be deployed in clients' own Data centres and accessed via their private network or the public Internet.

Hosted within BSNL Data centres, the MCP comprises industry-leading hardware, VMware virtualisation technology, and Managed Cloud Control. Managed Cloud Control provides operational control and automation of cloud resource provisioning, orchestration, administration and billing. The MCP enables clients to manage their assets via a web-based interface or REST-based application interface (API), supporting integration of the platform with third-party cloud or enterprise system management software. As a single platform for all of BSNL Cloud Services, the MCP enables clients to move easily between public cloud, private cloud and hybrid cloud models without the need to re-architect and re-integrate the underlying infrastructure.

Through this unique architecture, BSNL offers three implementation options for CaaS cloud services: Public CaaS, Private CaaS, and Hosted Private CaaS. In addition, BSNL offers hybrid solutions that include dedicated server hardware through our hybrid Managed Hosting offering.

2.1. Public CaaS Overview

The Public CaaS is an enterprise-class CaaS offering provided via the Internet and MPLS as a scalable monthly usage model has been built using industry-leading hardware and software. The platform is fully automated and orchestrated via purpose-built software, and comprises servers, storage, and network elements, coupled with virtualisation technology and operating system software.

The Public CaaS is a comprehensive set of cloud services and solutions designed to help organisations make transition to the cloud. Unlike other cloud solution providers that lack systems integration and managed services capabilities, we have the deep enterprise technology experience and proven implementation knowledge to support an effective migration to the cloud in a manner that doesn't leave the client with an inadequate or incomplete solution.

The Public CaaS offering is a pre-integrated and fully managed platform that significantly expedites new product and service introduction to the market and reduces the operational risks associated with building a private cloud in-house.

Additional benefits include:

- Easy online sign-up and purchase, with infrastructure provisioning in minutes;
- Rich online community to share and collaborate with peers;
- Web interface plus a complete set of Application Program Interfaces (APIs); and
- Industry-standard technology, including VMware, Cisco and EMC.

3. Service Reference Architecture

3.1. Cloud servers

BSNL deploys virtual servers using VMware's industry-leading virtual infrastructure platform. Our cloud servers support popular operating systems including RedHat Linux, Microsoft Windows, CentOS, SUSE and Ubuntu. Our solution provides you with granular control over the configuration of your virtual servers, including the number of virtual CPUs and the amount of RAM and local storage allocated to each virtual server.

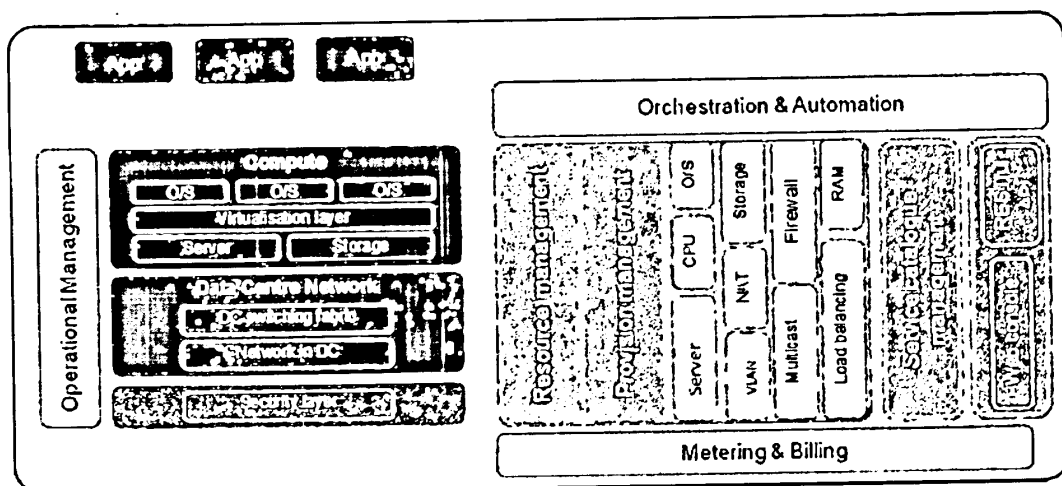

Servers can be deployed and managed either through the administrative user interface (UI), or through corresponding functions of the open REST-based API.

Additional features include:

- Licensing for the underlying operating system, enabling automated patch updates through Red Hat Network and Microsoft Windows Update Services;
- All servers are assigned a static private IP address accessible only through a VPN. Servers are mapped to static public IP addresses only as needed;
- Role-based administration allows control over which administrators can manage servers;
- Ability to clone virtual servers to create client-specific images that can be used to deploy copies of a customized server configuration; and
- Ability to import/export server images, enabling clients to transfer virtual machines to and from their own infrastructure.

3.2. Service Reference Architecture

Provided below is the high level reference CaaS Services Architecture.

Public CaaS Proposal for ECI

3.3. Cloud networks

Each cloud server resides on a cloud network – a client-specific, Layer 2 VLAN on a Cisco switch: this guarantees both high security and sub-millisecond performance. Clients can deploy as many of these network segments as they require, ensuring servers remain isolated from each other from a network perspective. This allows clients to build multi-tier network architectures to separate data tiers from front-end web tiers, providing an additional layer of firewall rules to protect sensitive data.

The cloud networks provide enterprise-class hardware-based networking, including:

- Private IP addressing for all cloud servers, with the ability for cloud servers located on separate cloud networks to communicate across this private IP space;
- Client-to-site VPN access for administrators to securely manage servers on their cloud networks;
- Customizable ACL-based firewall rules to control access to each network VLAN;
- NAT and VIP functions to expose private IP addresses to the public Internet;
- VIP functions support load balancing and port translation across multiple virtual servers, with the ability to take servers in and out of service based on client-defined monitoring probes; and
- Layer 2 Multicast supports for clustering implementations.

Robust security is embedded in the network infrastructure. We use Cisco technologies and carrier-class switching infrastructure to provide a 'defense-in-depth' enterprise security architecture that ensures clients are protected by multiple layers of security.

3.4. Private Cloud network integration

All cloud networks include client-to-site VPN connectivity and access to the public Internet. To enable clients to connect their cloud environments to their private networks, we can accept MPLS connections from ISPs that either own and/or aggregate MPLS connections within the same, or cross-connectable, facility where public MCP capabilities have been deployed. This allows us to terminate MPLS connections directly to MCP infrastructure within these locations, enabling clients to leverage their MPLS networks.

3.5. Security & Compliance

We realise that security in the cloud is of the utmost importance and takes an in-depth, multi-layered approach to securing the cloud infrastructure. At the infrastructure and multi-tenant application layers, we are guided by a defense-in-depth security strategy in which a series of security layers is implemented so that security is not dependent on any single solution. These layers include the following:

- Our cloud software-enforced multi-tenant security across all cloud functions, which also supports role-based permissions that enable customers to define which functions, can be managed by which users within their organization.
- Our existing in-house security capabilities and technologies as well as additional Managed Security Services provide around-the-clock monitoring of the cloud infrastructure, ensuring multi-tenancy controls aren't compromised.

Public CaaS Proposal for ECI

- Our Security Incident Response Team (SIRT) handles reports of security incidents. The SIRT will escalate the incident to law enforcement and/or executive management as prescribed in security policies.
- 24x7x365 firewall and VPN, support and maintenance.
- All the IDC's are ISO 27001 certified.

For Public CaaS services, we also employ edge-to-edge security, visibility, and carrier-class threat management and remediation utilising industry-leading Arbor Networks Peakflow. This approach enables us to compare real-time network traffic against baseline definitions of normal network behaviour and immediately flag any anomalies due to security hazards such as: Denial of Service (DoS) and Distributed Denial of Service (DDoS) attacks, worms or botnets and network issues such as traffic and routing instability, equipment failures, or misconfigurations.

Data privacy

The cloud service doesn't use encryption at the VM or physical layers. Clients are free to employ file and disk encryption inside the guest operating system to suit their needs and meet their policy and compliance requirements.

Physical environment

The physical security of all equipment co-located within BSNL Tier 3 data centre facilities includes the following provisions.

- All areas within the facility are monitored 24x7x365 by closed-circuit cameras and guards.
- The data Centre space is physically isolated and accessible only by authorized administrators.
- Access is restricted to authorized personnel through biometric two-factor authentication.
- CCTV digital cameras cover the entire datacenter, with 24x7 surveillance and audit logs.

Power and environment

- Redundant UPS and generator backups for all systems
- HVAC (Heating Ventilation and Air Conditioning) systems are arranged in an N+1 redundancy configuration
- Automated controls provide the appropriate levels of airflow, temperature and humidity

Fire detection and suppression

- Multi-zoned, dry pipe, water-based fire suppression systems
- Monitors to sample air and provide alarms prior to pressurization
- Dual alarm activation necessary for water pressurization
- Water discharge specific to fire alarm location

Flood control and earthquake

- Moisture barriers on exterior walls
- Dedicated pump rooms for drainage/evacuation systems
- Moisture detection systems
- Location-specific seismic compliance
- All facilities meet or exceed requirements for local seismic building codes

Public CaaS Proposal for ECI

3.6. Network security

Our public cloud is built on a secure networking environment that every client can leverage and manage to suit its own specific needs. Each client is allocated their own Layer 2 VLAN(s) built on advanced Cisco switching fabric. Network traffic is restricted to client-specific VLANs unless the client configures external Internet access.

Administrative access to these servers is through an SSL-based VPN. Other access can be configured by the client. Every client VLAN is also connected to a client-manageable ACL-based firewall. This firewall can be configured to NAT server IPs to public IP addresses, enabling external access to the servers. Full ACL, load-balancing and port translation functionality is available to the client, enabling fully customisable, controlled and self-managed network access.

Every public MCP has a network-based Intrusion Detection Solution (IDS) that runs on-going vulnerability assessment, threat detection, traffic anomaly, and DDoS protection processes. These processes run 24x7 and alert our security team should any security concerns be identified.

The cloud UI and application architecture leverages sophisticated role-based administrative controls. Each user is provided with role-based access permissions that assign read and write permissions individually to the network, cloud servers, cloud files and cloud audit reports. The system logs each action taken in the system and ties it back to the user who performed the action. These logs track changes that take place via the web-based UI or actions taken via an API call. In addition, a host-based intrusion detection system monitors all application logs, enabling rapid response to any perceived security threats.

3.7. REST-based cloud open API

Our Cloud Hosting provides all clients with easy-to-use REST-based APIs designed to allow the integration of cloud functionality into client applications. The cloud API provides control of all aspects of cloud servers and cloud networks through an easy-to-implement structure requiring minimal inputs and processing. The API mirrors almost all functions available through the administrative UI.

3.8. Managed Cloud Control orchestration software

Managed Cloud Control is a sophisticated cloud management system that provides complete automation of the orchestration, administration, provisioning, management, support, metering and billing of cloud-based resources. It goes beyond providing simple provisioning of virtual machines onto physical servers, to also deliver the following:

- **Easy-to-use interface:** The simple, flexible web-based user interface is intuitive and provides a common user interface across both public and private cloud implementations.
- **Fully programmable:** The open cloud API provides equivalent functionality for automated provisioning, orchestration, and the ability to integrate into existing third-party provisioning and monitoring software and solutions.
- **Granular control of resources:** Cloud servers can be configured on the fly, supporting the customization of CPU, memory and storage on servers without the need to create a new instance.

Public CaaS Proposal for ECI

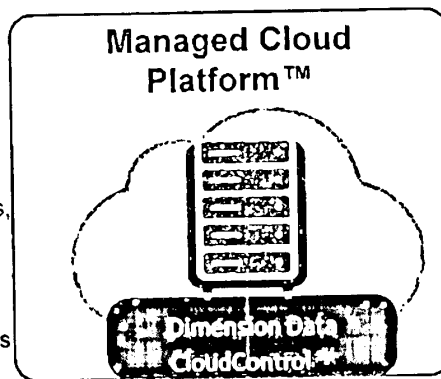

- Reporting and auditing: The system provides detailed audit reports, enabling administrators to identify all actions taken through the UI/API. It also provides a variety of usage reports that enable administrators to identify historical asset usage.
- Import, export and cloning: The system allows clients to clone cloud servers to create their own images for the deployment of cloud servers.

6. Maintenance and Repair

Service provider shall immediately upon receipt of written notification from ECI or verbal notification in cases of urgency or emergency; investigate any breakdown of service provider's network and carry out the rectification to enable ECI to use the services efficiently.

All verbal notification by ECI shall be supported by written notification to be sent by ECI within reasonable time after the verbal communication.

In case of major problem in the cloud services and if there is need for immediate maintenance; Service Provider will inform the ECI immediately.

The Service Hours are defined as 24x7x365 which refers round the clock round the year

7. Public Compute as a Service (CaaS) Service Level Terms:

Service Levels : The following Service Levels apply to Public CaaS (each Service Level and the terms and conditions that apply are described in more detail below):

- a) Service Uptime Target - 99.5% Uptime
- b) Support Response Time Target - 30 minute Support Response Time Target for Emergency Incidents and 120 minutes for normal incidents.
- c) Latency Target - <1ms Latency Target for Latency between Cloud Servers in the same Cloud Network.

Actual performance against the above Service Levels will be measured using BSNL's current monitoring tool as implemented by them. ECI will also have the access to this monitoring tool.

Subject to the Terms and the remainder of this document:

- a. Service Uptime Target: For Public CaaS deployments, BSNL shall provide 99.5% availability of ECI's Cloud Servers. This Service Level only covers unavailability of a Cloud Server due to the hardware and hypervisor layers delivering individual Cloud Servers. A Cloud Server will be deemed "available" for purposes of this Service Level if the virtualization hardware and hypervisor layers delivering individual Cloud Servers are available and responding to the Monitoring Tool.

V.C. Goel
UNDER SECRETARY
ELECTION COMMISSION OF INDIA
NEW DELHI-110001

b. Support Response Time Target: For any Emergency Incident properly reported by ECI as described in the Section 6, BSNL support personnel intend to contact ECI regarding such Emergency Incident within thirty (30) minutes from the time the Emergency Incident was initially reported to BSNL. If BSNL reclassify an Incident from an Emergency Incident to an Other Incident, then the "Support Response Time Target" Service Level (including this Section 8.3 (b)) will not apply to such incident.

c. Latency Target: BSNL intend to provide a Latency (as defined above) of less than one millisecond (1 ms) for the transfer of data packets from one Cloud Server to another Cloud Server within the same Cloud Network. "Latency" means the amount of time it takes for a packet of data to travel from one point to another. Latency measurements will be determined by the Monitoring Tool.

8 Service Level Credits:

8.1 Definitions.

"Downtime" means with respect to the "Server Uptime Target" Service Level, the period of time during which a Cloud Server is not available (as described in Scope of work).

"Duration" during a particular calendar month means the total duration in minutes of the Downtime, Response Delay or Latency Degradation (as applicable) in such calendar month, calculated in accordance with this Section.

"Latency Degradation" means the number of minutes for which the transfer of data packets from one Cloud Server to another Cloud Server within the same Cloud Network is equal to or greater than one millisecond (1 ms).

"Response Time" means the number of minutes that elapse between the time ECI properly reports an Emergency Incident via the GSC as described in the Terms, and the time our support personnel contact ECI regarding such Emergency Incident

"Service Level Failure" means, for a particular Service Level during a particular calendar month, a failure by our side to meet such Service Level during such calendar month (excluding any failure comprising or caused by an Excusing Event).

I.C. Goel
I.C. GOEL
INDIAN SECRETARY
ELECTION COMMISSION OF INDIA
NEW DELHI-110001

-1563-

"Service Level Credit Percentage" means, for a particular Service Level Failure, the corresponding percentage set forth in the "Service Level Credit Percentage" column of the applicable table in Section 9.3 below.

8.2 Calculation

- a. Where there has been a Service Level Failure during a particular calendar month and where ECI is entitled to a Service Level Credit hereunder, the total Service Level Credit will equal:

The Service Level Credit Percentage corresponding to the Duration of such Service Level Failure, as set forth in the applicable table below, multiplied by.

ECI's Monthly Fee for the particular Location (as specified in the applicable Order) in which the Service Level Failure occurred.

Service level credit calculated above will be deducted / adjusted from the next quarterly bill.

For the avoidance of doubt, the calculation of such Service Level Credit will not include any other fees, costs or charges incurred or payable by ECI, including Fees for other Locations.

- b. If a single event or set of related events results in more than one Service Level Failure, ECI will be entitled to receive no more than one (1) Service Level Credit corresponding to such event(s). Without limiting the foregoing, for any downtime for which ECI is entitled to receive Service Level Credits, ECI will not be eligible for Service Level Credits for Latency Degradation during or related to such Downtime and no such Latency Degradation will count toward the Duration of Latency Degradation.
- c. Notwithstanding anything to the contrary herein, at no time will the total cumulative Service Level Credits payable for all Service Level Failures that occurred during a particular quarter exceed Ten percent (10%) of the Quarterly Fee.
- d. Service Level Credits are ECI's sole and exclusive remedy and BSNI's sole and exclusive liability with respect to the failure to meet the Service Levels and such failure will not be deemed to be a breach of the Terms or ECI's agreement.
- e. For the avoidance of doubt, all Service Level Credits will be calculated solely as set forth in this Section 9.2 based on the tables set forth in Section 9.3 below (which have been based on a standardized calendar month for ease of calculation), in lieu of any uptime, availability, latency or response time target values or percentages set forth in Scope of work.

8.3 Service level Credit Percentage

8.4 Measurement:

Service Level Credits are calculated on a calendar monthly basis, and all Duration measurements are reset at the beginning of each calendar month (i.e. Durations do not "roll over" to subsequent months). The Monitoring Tool will be the official source for determining whether a Service Level Failure has occurred and for measuring all Service Level Failures and Durations.

As per the schedule, the collection and linkage of Aadhaar with EPIC shall be completed by 03.05.2015. During the video conference held on 28.04.2015, the DEOs have promised to achieve cent percent coverage by 10th of May in rural areas and by 15th of May in Urban areas.

It is learnt that the Election Commission of India has taken up the project of linking of Aadhar with EPIC and this project is being implemented in the States of Telangana and Andhra Pradesh through the District Election Officers.

This is apparently a pilot project taken up by the ECI on the methodology developed by the Office of the CEO, AP and Telangana, to link Aadhar data with EPIC, as part of the National Electoral Rolls Purification and Authentication Programme (NERPAP) launched on 03.03.2015 vide ECI Circular No. 23/1/2015-ERS dated 27th February 2015 to all the CEOs of all States/ Union Territories.

We have serious reservations on this project being taken up, mainly on two grounds, namely (1) both the Aadhar Cards and EPICs are totally different types of identity cards and meant for mutually exclusive purposes; and (2) the project of Aadhar seeding goes counter to the interim directions of the Supreme Court dated 23rd September 2013, which have been reiterated by the Honourable Apex Court on 24th March 2014 and again on 16th March 2015.

EPICs are issued to eligible voters who are 18 years of age and above and are meant to entitle them to exercise their franchise, whereas Aadhar cards are issued to any residents of India (citizens as also domiciled foreigners) irrespective of their age. Aadhar card does not entitle the holder to cast his vote. EPIC does not entitle the holder to claim any benefit from the Government but it only endows the holder with the right to vote.

Yet, based on the instructions of the ECI, the district election officers have taken up door-to-door verification through the Booth Level Officers for collection of Aadhar details and inclusion of Aadhar numbers in the electoral rolls, as well as identification of the shifted/dead or 'ineligible' voters and for deletion of multiple entries and for correction of errors in the rolls. The programme commenced on 1st April 2015 and it is to be completed by 15th May 2015.

It has come to our notice that the BLOs and other personnel deployed by the GHMC and the District Electoral Officers for collecting the details of Aadhar linkage for the EPICs are insisting on voters to produce the Aadhar cards. In the absence of Aadhar details being made available, the GHMC personnel are marking out the names of such persons. They are also marking out the voters for deletion of their names from the electoral rolls on the ground that they have shifted out from the listed addresses.

As per the Action Plan drawn up for Aadhar seeding, the BLOs and other personnel are issuing the so-called notices to the shifted electors for deletion of their names from 1st April 2015 and this would go on till 23rd May 2015. The deletion of names of shifted electors is being done after door-to-door verification from 15th April 2015 and this exercise would be completed by 16th May 2015.

It may be pointed out that the ECI takes up summary and intensive revision of rolls from time to time and the last such official exercise was completed and the final rolls were published on 17th January 2015 after due verification. Moreover, online registration of voters is done by following due process of verification. This being the case, how come the BLOs mark out the voters for deletion of their names on the alleged grounds of shifting of residence?

We may point out that this kind of Aadhar seeding and the consequent deletion of eligible voters by the thousands on the ground of shifting of residence or their non-availability during the visits of BLOs/other personnel is not only patently illegal and arbitrary but is also a serious violation of the interim directions of the Supreme Court issued and reiterated on three occasions since 2013.

It is worth recalling that the Supreme Court had observed on 23rd September 2013 that "no person should suffer for not getting the Aadhar card in spite of the fact that some authority had issued a circular making it mandatory." Again, on 24th March 2014, the Supreme Court had directed the Government to withdraw instructions that make the Aadhar cards mandatory. The Court had also directed the Unique Identification Authority of India (UIDAI) not to share the biometric or other personal information with anyone without the permission of the card holder.

On 16th March 2015, the Apex Court again observed that "it has been brought to our notice that the Aadhar identification (card) is being insisted upon by various authorities. We expect that the Union of India and States and all their functionaries shall adhere to the order dated September 23, 2013."

This being the case, we would reiterate that this exercise of linking EPICs with Aadhar cards is arbitrary, illegal and uncalled for.

We demand that this project should be scrapped immediately and the District Electoral Officers in AP and Telangana should be specifically directed to desist from deletion of names of thousands and lakhs of voters on the alleged ground of shifting of residence or non-production of Aadhar details.

Thanking you

Yours sincerely,

(ASADUDDIN OWAISI)

A copy of the representation second cited is sent herewith to the District Election Officers of Hyderabad and Ranga Reddy. The District Election Officers are informed that furnishing of Aadhaar Number is not mandatory, but it is optional. Non furnishing of Aadhaar Number will not be a ground for rejection of application and the applicants should be requested to give this information in their own interest to ensure defect free Electoral Roll and for incorporation of correct data of electors in the roll. Instructions in this regard have already been issued vide reference 1st cited.

The District Election Officers were also clarified that Aadhaar with any address in the country can be accepted for linking with EPIC and it is not required to have Aadhaar Card with the same address as in the case of EPIC and that as per the election laws, for the registration of electors, the basic qualifications are (1) minimum of 18 years (2) ordinary resident of the constituency

BLO is required to verify whether such persons are ordinary resident of the respective polling station area with reference to EPIC / Electoral Roll data only and report the fact to the ERO for taking further action.

However, AIMIM has complained that GHMC authorities are insisting for producing Aadhaar and in the absence of Aadhaar details, being made available, GHMC personnel are marking out the names of such persons and for deletion of their names from the rolls on the ground that they have shifted out from the listed addresses.
